

Las Cruces, NM – Today, Congressman Harry Teague announced that Grant County has been awarded four new mini-buses to add to the county's current transportation fleet. The award, for use in Silver City by the Department of Transportation, also includes the construction of a new transit facility in Silver City.

"In rural areas where residents often times have to travel great distances to get where they need to go, it is important that they have access to transportation that is reliable and convenient," said Harry Teague. "I am pleased that this targeted investment will offer many people in and around Silver City dependable and safe solutions to their transportation needs."

The Bus and Bus Related Equipment and Facilities program, overseen by the Department of Transportation's Federal Transit Administration, provides resources to modernize existing rail systems and finance the construction and replacement of buses, transit facilities, and related equipment. Teague is a member of the Transportation and Infrastructure Committee.
